PORTLAND, TIFSUAY, JAN 26, 1846

THE COMING STATES There is not much doubt that the senate will ross a bill for the admission of Washington ter pass a bin for the admission of wanting of the respective pass and Delegate Voorhees, shortly after the opening of the session, introduced into the respecti in to the seemon, introduced into the topic of the seemon, the seemon in the seemon the states; that of Mr \ oorhees proposed to lay re-strictions upon the power of the new state as to corporations, requiring the constitution to provide that "no corporation shall be ormed within the send state for the purpose of haring and selling real estate, and that necessporation shall own or control within said state more real estate than is essentially necessary to carry egislature of said state sharl enact such aws as til impose fines and penalties upon any rail other transportation company, or its agents, that shall give or offer to give, directly or findirectly, any passes, tickets, or other tr portation to any member of said legislatur any officer thereof, or in any officer under said state government." Mr Dolph's bill culties these particulars, and conformed mainly to the conditions under which states hitherto have

It is now reported that the senate committee on territories, after having spent a day in put-ting Mr. Voothees's bill into shape, has decided to recommend the admission of Washington It is probable, therefore, that some of the unconditions contained in the Voorbees bill have been eliminated, and that the usual form bare been eliminated, and that the detail that employed in providing for the admission of new states will be adhered to, with such variations only as may be necessary to this particular case We should see, indeed, no objection to he un-usual conditions n amed in the Voorhees bill, and Washington will certainly need protection against the domination of corporate power, but manus are domination of corporate power, but it the respie cannot themselves deal successful by with these problems. ly with these problems, under their state gov-ernment, the Northern Pacific will be their mis-

But will the house pass the bill? It is doubt Int. If dertainly cannot admit Washington, and use to admit Daketa, which has three for thench Washington elected a delegate in 1884, as a return to the interference of the Northern Pacific railroad in the political nars, however, the democrats of the house may be persuaded that the territory will be dem occurric henceforward, and indeed it might be, if the same causes that made it democratic in the last election should continue in operation. But Dakota is immovatily republican, b It is a question then whether the majority it is a question them when he is democrate will let in two new states, one certainly republican rad the other probably so. In 1876 the democratic party lost the presidency in consequence of the admission of Colorado and democrate in congress have said with great the colorado and the control of the admission of the congress have said with great the colorado and the congress have said with great the colorado and the colo rankness that they will not permit repetition of

that experience.

The further suggestion is made that Wash ington, Dakota and Montana all be erected into states and admitted at once, and, as Montana ons always been democratic it might be counted as no effect to Dekoia, leaving Washington to be contended for by the two parties. The result of this in LSS would probably disappoint democratte hopes, since the growth of the republican narty in the territories of the northwestern behas been very marked ever since the railroad era began. All three would probably contri-bute their electoral votes in 1887 to the republi-can column. But apart from these consideracan column. But apart from these consideraterritories erected at once into states, and ps Weshington is our nearest neighbor we should be particularly glad to see her admitted. She has the necessary population and wealth accord-ing to precedent, and all the resources and all the premise of a great state

### BENEFOLENT PESFOTISM

During the past few years many large employ ers of abor in the United States have made ex traordylary efforts to advance the condition and character of the working people who, it a sense, are under their control. Benevolent intent has been at the base of all schemes of this sort, but in every prominent case the effort has been made wisely with the idea that "benevolence of this into should, in the end at least, support itself. It has been assumed that if the working-man were wall housed, if his intelligence were raised, if his finer tastes were cultivated, he would be a happier, more prodent, and a better man that he would be more efficient as a man that he would be more efficient as a mechanic, or even as a laborer, and that his lot in life would be greatly improved. With these propositions as a basis of faith, and with the best purposes in view, there has been a great deal of henevolent activity Many plans have been and still are being tried. The most notbeen and still are being tree. The able, or at least the most conspicuous effort is that of the Pullman manufacturing company,

near Chicago
This company which suploys some thousands of men, bought a line tract of land, and created a "model town The flouses are harmonious in design, and without exception are spacious and artistic hach has its pretty patch of ground kept in perfect order by gar deners employed by the company, and each is provided with gis and other modern conveniences. The systems of drainage fire protection, police guardianship, etc., are perfect in their way, and all under the direr management of the company A fine general library is maintained blewise by the compaby, and the theater and even the churches are company property, and, in a sense, under company management. The visitor at Pallman sees on every hand neatness and thrift, sees nothing in fact that is not pleasant to look upon Pullman is an ideal fown but after at working people do not like it, and the reasons they give are highly creditable to their American character of they have in a state of incury, but directly or indirectly they must pay for it all and this they say is more than working people can afford But this is not the chief objection. They object company, and the theater and even the churches But this is not the chief objection. They object to an outside management of the private concerns of the In sili public affairs at Pulman the company? possiblely controls. The residents have no will in those matters of local go ernment in which every American feels that it ernment in which every American was that it is his right to have a critizen's park. In taking up his residence a Pullman a workingman unde himself in nine cases of every an batter surrounded in all it jaylal respects and as respect a his opportunities for set of this e than at any former time in his life, but with it all he suffers a distinct loss of personal independence and i distinct shock to his spir t of Americans her is surprising that Pullmunts and his life is not a hoppful sign for the fu are of the country that the this country that it is ?

Another "effort" in many respects an ar it that at lottman is being male by the Willy mantic Thread company, in Comnettlent. Its results have moved a recent foreign visitor to say that "this is an establishment which more than any other in America encourages hope for the future of labor." The operatives in the thread works are all foreigners of poor could non in the beginning, and a distinctly lower class than the minabitants of Pullum, who are skilled mechanics, and almost all of Col. Earrows, the president and mu burit. Col. Earrows, 13e presument and thin ager of the thread on aparty, has collected his many lundreds of apartitys about him in a village owned by the company He has made he factory buildings convenient and artistic, decorated the operating rooms airh pictures and growing flowers, made the ab lift to read and write completer crysted a literary abc. made in flowers, made the shift to read the write com-pulsery, created a library, etc., made in-short another "mode kwn" over which he pre-sides, benevolently it is true, but with ducal sway. The condition of his foreign operatives

it is guite true, has been improved greatly un der this system. But is this a good school for American citizgnship? We fear not.

The fault of these and other similar systems is a radical one. They are forms of despottem, no less dangenous because henevolant. A man who accepts und r them an increase of his comforts such as i decrease of his rights.
The simosphere of these proprieting towns is not a good one to bring up American youth a Retter independence of character with poorer conditions and low resemble of the conditions. conditions and less personal culture a wo ld of advantages at the cost of in lepon

#### "TEMPERANCE HOLK!

Nonces through the press again semind he sublic that the "State Temperance Alimnics" of Oregon will shortly mee, in annual sear in The shody is corposed of debignoss sent by courcles Sunday schools and temperance ledges pearly to colgnated place to hear each o her talk and read essays upon the subject of temperator Its only aggressive feature is represented by a committee on "Polit cal Action," that such year formulates a high-bounding recruition which is us saily passed max imously—the vomen of the delega ing-pledging each and every member of the alliance to work in the party primar as and con ventions for the es ection of temperatics men for candidates for the various county and 8 258 offices, and to you and work at the pole for the election of the same. This duty accomplished, muce windy options on a "third party" bass is industed. After hich, having thanked transportation companies for reduced fares to delegate the same and the portation rempunies for reduced fares to delegates, local musici is for their part in making the session interacting and having urged the circulation of prohibition petitions for signature, the body algorithm to meet twelve morths later t got again through the cata lished programmel of "temperance wort". The women reduced to their hemes and the tien to their a catama and the men to their access and the almost hust wort? The women culture to the relation bust the tien to their ar cat one, and the saloon bust mess does not know that a blow has been aimed at it. Elections come an at stated periods, and part aps one man; a dozen, who piedged him self according to 1 e resolution of the com nicself necording to 1 e respection of the colimbre on political ac on of the Alliance, realiers what influence he has, together with his vote, hag itory by remembering his plading. The majori y go with their party, just as every practical person who was presen when they answered "nye" to the roll-call upon the resolution ex

B fond the evil tencency that breaking a bledge exerts upon men in weakening their re-eard for an obligation, and the folly that atgard for an obligation and the folly that ittacles to the net when women pledge themselves to do that which is possible only for luly
nan filed electors, the annual meetings of the
State Temperance All ance do no harm On
the contrary, they give a considerable number
of worthy people in various communities the
chaice to take a trip a about half the usual
rates of travel, while socially they have many
plet sent features. To tile credit of the associator it must be sent further that its effort lots tior it may be said, further, that its effort 100 not reach far enough to stir up strife or provide anger. It is mersly a placed mirror, reflecting the average u spract al, frutiess endeavor, known everywhere as "Lamocrance work

#### HHISKY IS BLER.

The lipur question has taken a new turn in New York, where a bitter war has troken of the tween the whicky in and the browers. Off as it may seem says a New York special, the dealers in tique shoth of intrinsus and mult, are to a dealers in tique shoth of the bre wars have stated that they favor the Rev Dr. Howard (rosby spins of a leasy flatnes for whisky dealers (\$1000), a comparatively light incuse for yearspliers (\$1.00), and the cultivation of gibt with and their diffusion on the part of he wile and heer driving on the part of he pecple. The whisky men charge tat the excise bill, which failed hast year, wis lost through he mact sity of the brewers, who refused to help it. Now, the brewers say the; will do nothing for the liquor men this year Al a meeing of the whicky men last wask, some of the members were violent in the expression of their feelings toward the brewers, and, openly declared that they could win in the and, openly declared that they could will the leg statute without the browers' aid, and even with that interest arrayed against them. If was reported to the control in dy that a conference with the browers had resulted in the simple stapment from the mait liquor makers that they would not interfere with the whisky men's they would not interfere with the whisky men's operations at All any this year. It was determined to submit to the legislature the saire measure that failed through the inac sight of he brewers leat session. This bill provides for the opening of liquor saloons between certain hours sundays. It also covers the incense fee, and in other respects so modifies the present excise law as to render it what the whisky men term is larged. The terms rener needed are ideal. 1 term liberal. The temps rance people are idol ing on at what they call a "dog-eat-dog fight" will curious into est, and hope for good results from it in the way of rousing public disguet.

The bogus paper says THE DREGOVIAN at tradies language to it about the bogus resolu-tions, said to have been put forth by a committee of the Washington territory legis ature, which it never used a all, "placing it in quotation marks for the purposes of deception'. The huntuage placed in quotation mark was taken induse placed in enotation mark was taken from the bogus resolutions, which, the bogus pager reprinted in cur, "for the purposes of de-ception," severa days after their fainty had been exposed. The bogus paper reprinted three hogus resolutions, under headlines devised to make it appear that This discontain had been the blocked?" with a report of a special connamer reprinted as true, "for the purp been "rebuked" by the report of a special con m iles of the legislature,—though t know that the statement was wholly false lawas a proneeding highly characteristic of scrub and hogus jo rnalism

There was a peculia quality of fur abroad in third on in New Year's day I consisted in his map printed or a tag in great black letters the wards, "When I am full send me home," an in affixing the same to the backs of solver, dein affixing the same to the cacks on solver, te-cal, unsuspecting callers by some 'fitting' friend on the street. This is of a piece with that very funny rustom, practiced in some rural neighborhoods, of trying the long grass in a stare across the path in summer, or of slyly peking snow down the back of hig awayward and bash ul caller in the winter, or of arrang ing a plu in the than it is school master, or of patting peoples on the store at a welgan's rights meeting. To be class of persons who appreciate that sort of thing the attendant in" is perfectly exc. utrating

The mad dog scare has reached the p open time of a pahr in many localities in the East In point of fact there a little or no cause for the general starm. It comes apportunely for Di Faction however, though the test of his carre as performed appr the three children sent over to h m from Newsek will not be considered a in in from Newwith with put the characters at markship one; I symptonis a this displantial fall to be descloped, from the fact that it is very uncertain whether the digital bit them was mad or not. I viports among professional men agree i gat an undisputed case if bydrophobia has not tgat an industrial cage it opinional national concurred in any part if the civilikel world for sears. If his a true, I Pasteur is not likely by greedy agent man kird, even if it is all that by that at the be, around his a tile need for is applicated in is so shall as to secreely I we have the ited existence

An account of the resources and attractions of I mon county has just been given to the public by the local board of immagration. The subject is nobly one and has been admiral by stid furthfully deal with In his brief preface the ripther says. When once the natural advan-tiges of Union count are known the people will come There is room for ab two extilers. Fir mining enterp ises, when fully ipened, with or quire several thousant is one. The tourist will had many points of interes. All of which is quite true,

Judge A W Tourgee, the noted writer, now a resident of thantaugus county, New York, has a resident of "intracting county, for Note, has sken out about twenty ps ents of a new har-ness and expects four others. The harness is to be made entirely of meral, and among the ad-santages claimed for it are that it is lighter, less sumbersome more early adjusted and will not chafe as much us a leather harness. It is expected to cost about 30 per cent, less than leather harness, and it will be more durable.

One of the first duties of a commonwea the to provide for such of its unfortunatee as a e in capacited by the loss or lack of any of the com-mon faculties from providing for thems.lves and to furnish to others, partially incapac tated by such loss or lack, the special metriction necessary to enable them to maintain them selves indepen lently The first of these classes, the hopelessly means and idiatic policy as just ers, and philanthropy, or humanity, or countril son, or all three, provides for without hope of placing them in a condition beyond that of mere physical constant. To the latter belongs the deaf mates and the blind, and in the same spinething more than present man benance is de-manded. Political economy strong y seconds the efforts of prilanthropy in deciding that persons thus berefa of one or more of the sunses, bu with intellects unimpaired, islail be edu tated with a view to make of them competent, incustrous and s if-helpful citizens and main bers of society Experiment directed by enlightened thought, and encouraged by the ex-periences of the mast two or three decades has fully demonstrated the possibility of making this class largely at least self-sustaining, this repleving relatives who are frequently the ani the public, already severely taxed in other directions, from the burden of their maintenance. Hardly less important perhaps, indeed, and maintains important than their maintenance. of greater importance than these material coof greater importance than these matters as cerations is that of instilling into lives, t us hereft, the feeling of independence, without which a human being is left a cringing almoner upon the bounty of others, or moulded into an mensate creature, content to live upon dole. Statistics show that one child out of every

Stangics and the state is deaf, and, as a consequence, durat of course is needs no argument to show that it these children are educated up to a self helpful standard in any direction, special effort will be necessary and in providing educational facilities for these children the state only does what it does for ord nary children, though necessary at much greater expense. That this sen input is appreciate in this state is shown by the fart at the fact of the fact List the deaf mute school at Salem is now after a period of siveral years of struggle, comtons ally housed in a lome of its own, largely by its efforts of private henerolomes, with account of a litons for thirty pupils. The average attenuant the past year was twenty-six, though the the past year was twenty-six, though the full number of pipils emolled was thirty, and it is gost of heir maintenanceduring the school year was, by careful financiering, brought within \$181 for capita. Comparison of these highest will be the cast of keeping and durating this class of pupils in other states shows a large "alance to favor of the Oregon school. Without doubt the taxpapers of the state would be satisfied with less than pipiching, exampling economy in with less than pinching, scrimping economy in the management of this school Prodigality on the one hand and parsimony on the other is almost equally reprehensible. The people of of egon are able the ducute the dear nuties of the state, and there is little doubt of their willing. ness to do s: They are willing to fully com-pensate the eachers who devote their time or this special work, and they do not desire a Dotheboy's hall till of face for the populs, a order that the expense account may make a good showing before the legislature

good showing before the legislature
Comparisons furnished show that the cost percapits for pupils a five prosperous just attons
in the East in 18-34 was \$-10 whild that in the
foreign school during the same parted was bit
\$113 15 From his showing it would seem
that our shool must lack many of the facilities
increase to the encountry that the entering these that cur shoth must mak many or the inclined processing to the successful education (\* deaf muter, cr that accomp ishments which are n is necessary ad more to the practical education if the class are at implied in the schools with which of imprised is made.

An appropriation that will insur- and pay for thorough work should be asked of the pext state legislature. I ordinately the at chilon (I that body will no be districted from the legitlands. work of the resson by control bargaining with correct men for senatoral peterment, and still more fortunately the corrup element in local solitics las dropped of like a goiged leach, content as the content of the men. with its foul fulness, making it possible for men of decent instructs, ordinary business attain ments and a capacity to correctly estimate the public needs to be chosen as legislators. To such as these, parsument in the matter of pro-viding for the education of the deal in it as and values for the ed Ruinio of the dear in rest, the blind will not commend itself as a virtue of special merit. Expuency ceases to be expuently when it hampers the work that I sets out to do An insufficient appropriation, if not money thrown away is so to the extent that the effect for which it was appropriated is handicapped by the insufficiency. The policy that keeps public institutions of the state below par as to exchi-lence, constantly exp sining away and apologic ing through fileir managers this and that then of necessary expense and as constantly begging for shelter it, which to house themselves, is certainly not a compliment either to the publical freeight or financial ability of Oregon states

According to estimates, the sum of \$5.0,000 would introduce the water from Crystal Apriliage into the city and claribute it it rough at the city. This probably would be the cheapest plan. whereby a supp y of pure spring water could be obtained,—Cast is to say, if the extense cid not largely exceed the estimate, before all was

The Asiarun rejoices that the Cascade tunnel is to be constructed and that the Northern Pacific is to go straight through to Tacoma, because, as a consequence there if, Astoria will become the great wheat-shipping port of the country. The argument is that the ORAN will be com pelied to make it such, in order o save itself

There were 13,983 marriages and 500 civores in Change in 1885 Judging from this r to about one twentieth of the people who marry about one twentieth of the purp auto maner as unstate a matter lundring from those who about one twentieth of the purp auto auto maner as a state of the purp and the purp and the purp as a state of the purp and

According to the Inter-Oceau, "The witter zephyrs of Chicago are so muschiscous, implicant and obtrusive that stone wills may not rebute them, and they can pour in at a teyl de with such persistency as to nullify the good intentions of any fire that ever blazed with an idy henavolency in stone or prize." benevolence in stove or grate "

even brothers, all raving manacs, are et route for the arylum at Jacksonville, Ille, a cit cumstance hat gives rise to the suspic on that there is a taint of insunity in the family blood Heredity 13 atways nosting about, seeking to make a post out of tritles like the above.

common content is as owner as a
number of the heady is a
number of the heady is
to the following conditions

First—That no license shall be result to bar
rooms drinking-shops for otherwise for the sale of
intoxiceling liquous except ut her like restrictions
imitations and bonds that are required by the gen
ral laws of the state and such other and further
requisitions is the common ouncil may by ordinance from line to time preserible.

Second—The restrictions the project license can
tained in the act based of the special season of the
Additions is the common ouncil may by ordinance from line to time preserible.

Second—The restrictions are projected state on
the property laws of the state must therefore be
amended and as the present licenses expire but
the side of the common content and
our prese it ordinance not being in conformity
to the general laws of the state must therefore be
amended and as the present licenses expire but
the side of February action on the part of the
common content is required by the ordinance on
mending the themse ordinance so as to make it
conform with the amended state law was taken
up and real the third thire with amendinable
recommon content is required to the continuous on the
license of the committee on health and
police The clausers problems as of the term
of the property of the

neath and pince

The synger commission for the Committee on street, reported back the ordinance; relating a the street commission of the commission of the street commission of the commission o

resulting is an inj ry to the city by driving residents away and preventing others occating here. Lain defined the soft impeachment that he measure was the resid of spide and the statement. The dispute continued for some time during which charges were made against the street to missioner which were successfully refuted by Wheeler and the street commissioner which were successfully refuted to Wheeler and the street commissioner than the street commissioner than the street commissioner than the work of the street commissioner than the council that the street commissioner has discussioned the street of the street of the council that it required a two-thirds rote to pass an ordinarse appropriating money and during a discussion on this question West moved that he ordinarse that the street commissioner than the continuance of the street commissioner than the other meeting. The motion is also underly taken through a ear that the absence of Mr Aye' che other meet are of the street commission which defeat the ordinarse for place of my passage but these oager or its passage scened to be table it vill require a read that the hist it is not likely to get OTHER DIATTERS
